

## Northbrook Junior High School Facilities Improvement Project Update

The new instrumental music classrooms, stage, and physical fitness/health classrooms are taking shape at Northbrook Junior High School. The project continues to proceed smoothly and is several weeks ahead of schedule, Director of Buildings and Grounds Russ Jensen told the Board during a June 30 tour of the construction site.

*Clockwise from bottom left: The exterior walls of the east addition – which will house two instrumental music rehearsal rooms – are complete; on the south side of the school, a completely re-built space will house a fitness work-out room and health classroom on the first floor, and an instrumental music rehearsal room on the second floor; crews are also making progress on the two-story stage area, which features balconies for greater performance options.*
